• If the systems is off, press **Power Button** and wait for system to turn on and touch screen to begin. (screens lower into position)

• Select input by pressing the desired choice, typically “**Room PC**” (located in back closet) or “**Center Wall Plate**”
Select the destination to display the input you just selected. Typically “All Displays”, but this allows you to select screens/inputs individually.

Finally, double check the volume is at the desired level (not muted unless necessary)
